Industry -driven solutions

When it comes to vehicle and asset management, each industry has a unique set of needs and challenges that must be faced. Dealing with events such as breakdowns, driver transgressions and schedule changes means that managers and owners are often forced to react to problems with emergency measures rather than using proactive planning. As a result of our experience across many industries, PragatiVTS-Tracking understands your business meaning you can rely on us to customize a solution that fits your business.

PragatiVTS-Tracking for the Logistics Industry

For a logistics company to realize a competitive advantage, fleet performance and efficiency are paramount. Effectively coordinating and managing a large number of vehicles requires instant access to relevant information, detailed reporting tools and a pro-active alerting system. With PVTs-Tracking, a logistics provider is given the tools they need to ensure that their business is moving forward at full speed.

Key Challenges

- Identifying the location of vehicles and/or drivers
- Manual monitoring and checking of timesheets
- Escalating overtime claims
- Under-utilization of vehicles and/or drivers
- High fuel and maintenance costs
- Inefficient driving and excessive idling

Our Solutions

- We provide real-time information regarding the status and location of all vehicles/drivers, while PVTs-History can be used to review any prior activity.
- PVTs-Report allows a quick assessment of the working hours of all vehicles/drivers, which can then be used to verify time
- Our report provides a breakdown of all vehicle/driver activity, including full details of all trips (including start/stop times and locations, total distance, total time).sheets and overtime claims.
- PVTs-Report highlights all vehicle/driver activity over a given period, as well as highlighting unused or under-utilized vehicles/drivers.
- PVTs-Alert provides instant warnings in case of dangerous driving, excessive speeding or out-of-hours use of vehicles, while PVTs-Fuel provides fuel usage information to help identify excessive fuel consumption.

It is our greatest privilege to offer you our ideology behind the evolution of our web based concept called as "Pragati Kiranam", that projects Great Minds and Inspirational Lives. The fundamental ideology behind the evolution of Pragati Kiranam concept is to project and document the accomplishments and attainments of several well-known achievers as well as the clandestine high flyers of our society, who have laid the well-made path we tread on to this day. Making known the illustrious lives and milestone achievements of the leaders on the path of accent is our commitment and endeavour. The key concept of our ambitious project is to offer to the future generations their core ideologies and under-takings in their respective fields of accomplishment, Spanning from spirituality to technology and various other diverse fields embedded within our social functioning that have formed, the very base for the evolution of our modern day world as we live in today.

Pragati Kiranam offers a common platform wherein life and accomplishments of highly successful people from all walks of life can be documented. Their path towards glory, will in turn inspire the raise of a new generation of talented & aspiring young men and women who can be greatly be benefitted by their experience and know how. Pragati Kiranam provides a highly secured and well monitored web space that enables users to publish their life stories, blog their achievements and upload their photos and videos onto very innovatively designed web templates offered for them .

Pragati Kiranam – "Welcome Zone to all Achievers irrespective of Boundaries". The Pragati Kiranam application is hosted in a highly available bandwidth location that is accessible from any part of the world and this hosting facility is also provided on unlimited data bandwidth and huge storage capacity. Pragati Kiranam avails users with a feature that automatically changes the web page template according to the user's preferred dates. This application accompanies another feature where application itself randomly selects web page template periodically from user's preferred group of templates that have been chosen according to the users prerequisites.

Pragati Kiranam web application offers personalized options for web casting individual profiles. Our templates are designed in such a way that it doesn't require any technical skills for uploading their profiles other than knowledge of simple English. Pragati Kiranam is built with highly professional well experienced development as well as executive team that operates with high integrity and professional ethics thus making us absolutely reliable.

PRAGATI BHARATH

THE RIGHT TECHNOLOGY, AT THE RIGHT TIME

www.pragatibharath.com

Pragati Bharath is one of the social undertaking under the banner of Ramki Technologies Pvt. Ltd with fundamental ideology to project and document the accomplishments and attainments of several well-known politicians as well as the clandestine high flyers of our present political scenario, who have laid the well-made path we tread on to this day. Until recently, the campaign strategies of political parties centered on public rallies, print, television and radio advertising. But, with the proliferation of Internet, computers and smartphones in the past few years, use of Technology and social media in public as well as private sectors has prompted politicians to look at the potential of the online medium for their campaigning purposes. Most of the younger voters use and share their political views on online political forums and blogs, post political or social material and also encourage others to take action. All in all, it appears that users with the strongest party or ideological ties are more likely to use social media and global networks for political or social purposes, to share political content, "LIKE" something, or try and raise awareness or share their opinions online About Our Cause and Endeavour.

Keeping in view the need for transparency between the voters and the political candidates of their choice. We have come up with the idea of Pragati Bharath that facilitates any user to know who are the nominated candidates for their poll constituency, the political career of the candidate, their future agendas, work done for the benefit of the masses previously etc., and thus help them make an appropriate decision while casting their vote. Pragati Bharath provides a well monitored web space that enables users to publish their life stories, blog their achievements and upload their photos and videos onto very innovatively designed web template's offered for them .

Our Vision, Mission and Purpose

To be a leading campaign partner in providing an internet based, nonpartisan solutions for elections and political campaign, that effectively utilizes technology and political knowhow to enable the candidates to publish their political profiles, their manifestoes and future agendas and to promote campaign awareness and as well as the necessity to vote among all the people of our country. Our mission is to be leading technology providers of digitalized campaign related services to all the political candidates campaigning for Indian General Election 2014. It is our aim to provide complete technology based solutions to meet all political campaigning needs.
